

Quality Assured

- ✓ All Trojan baths are 100% quality assurance checked - at every stage of production prior to any system being fitted.
- ✓ Each component part that makes our systems is 100% quality assurance checked prior and during the installation onto the bath by fully trained and approved operators.
- ✓ Pop up waste and overflow supplied as standard.
- ✓ Two year guarantee on all systems.
- ✓ All our baths are factory tested and approved. We test each one of our whirlpool baths under normal working conditions for 40 minutes and then a 20 minute standing period.
- ✓ By choosing an Aquair system on a Trojan bath there is no third party handling. We control the entire manufacturing process and the fitting of the system itself. We provide our own dedicated service van to ensure that we can provide a prompt and professional aftersales backup.

AQUAIR WHIRLPOOL BATHS

Time for You

Why choose Aquair?

Why choose Aquair?

Our range of outstanding Aquair whirlpool baths offer the same exceptional quality you've come to expect from Trojan with the added features of a relaxing spa experience:

Quality Components

All components of our whirlpool baths are produced by world renowned experts in whirlpool design and technology. Water is drawn from the bath and forced back through jets. The systems use flexible pipe work, which is smooth, so as not to retain water, yet strong enough to withstand any sagging.

System Choice

We offer a variety of systems which can be upgraded to include a number of different options, including a heated blower, offering an even longer relaxing experience.

Ambient Options

Aquair offer a range of lighting options to help you create the perfect environment for relaxing in. Choose from a strip of chromotherapy lights which can change colour or be set to a colour that suits your mood, a single light that changes colour or a single colour light.

Attention to Detail

Hygienic drainage is crucial to great design. Our pipe work is shaped and supported to promote maximum system drainage and minimal water retention. Ozonators are available for customers wishing to clean the water during use. A cleaning solution is also available to keep your system clean and fresh.

Safety

All our whirlpool systems include 'child safety suction'. Tested to BS EN 12764:2004+A1:2008.

AQUAIR
WHIRLPOOL BATHS

Whirlpool systems

Jets feed water into the bath as pressure creating a range of massages from relaxing to sports hydro-massage.

Level One

Summary
– 6 jet system

Jet type & location
– 3 midi jets down each side

Switch type
– Pneumatic switch

Fittings
– Engineered legset

Included
– Pop up waste & overflow

Level Two

Summary
– 8 jet system

Jet type & location
– 4 midi jets down each side

Switch type
– Pneumatic switch

Fittings
– Engineered legset

Included
– Pop up waste & overflow

Additional options

Bluetooth Connection
Play music through your bath by connecting it via Bluetooth to music streaming devices

In line water heater
Heats the water during the whirlpool cycle to improve relaxation and bathing time by compensating for natural heat loss

Ozonator
Removes harmful bacteria during the whirlpool cycle for added hygiene

Single LED light
One LED light that can change colour (seven colours)

Chromotherapy
A strip of small individual lights run down each side of the bath that in unison can change colour (seven colours)

Electronic upgrade
Removes pneumatic switch and replaces it with an electronic control pad (includes low water sensor)

Overflow filler
Allows the installer to connect the hot and water feeds to the overflow for filling the bath

Whirlpool cleaner
1 litre of whirlpool cleaner for hygiene and peace of mind

Our Aquair systems are available on most of our Trojan Baths. The following symbols against each bath denote the systems and options available.
